5. ACTIONABLE FIDUCIARY RECOMMENDATION

COMMITTEE RECOMMENDATION: ACCEPT MANDATE AS PROPOSED. The Serendib Conservative Allocation (35% AGG, 25% SPY, 15% GLD, 10% EFA, 10% XLE, 5% EEM) empirically satisfies the university's 7.00% hurdle (+91 bps CAGR margin), mitigates tail losses via coherent Expected Shortfall ($304k), achieves Basel Green Zone validation, and preserves +$890,000 in severe stagflation. Rebalancing corridor: +/- 3.0% absolute drift. Real-time surveillance: Interactive Streamlit web application.
